

PROFESSIONAL SUMMARY

Fullstack Developer with over 4 years of experience specializing in Frontend engineering with React, Next.js, and NestJS. Experienced in building scalable SaaS Web Applications in close collaboration with UX/UI, Product, and Business teams. Proven track record of taking full ownership of end-to-end technical solutions to maximize business impact and deliver high-performance user experiences.

TECHNICAL SKILLS

- **Languages & Frameworks:** TypeScript, JavaScript (ES6+), React, Next.js, NestJS, Astro, Node.js, HTML5, CSS3, Tailwind CSS, Styled Components, MySQL, PostgreSQL.
- **Tools & Architecture:** Nx (Monorepos), Storybook, Jest, Cypress, Webpack, Babel, Docker, Clean Architecture, UML, OOP.
- **Version Control & Methodology:** Git, GitHub, Agile Methodologies (Scrum).

PROFESSIONAL EXPERIENCE

Fullstack Developer | *Freelance / Self-Employed*

May 2025 – Present | Buenos Aires, Argentina

- **Thinking Notes (Product Owner & Lead Developer):** Engineered a note-management Progressive Web App (PWA) using React and TypeScript with Google OAuth integration. Built a multi-tenant NestJS/TypeScript backend API featuring secure CRUD operations via Supabase JWT tokens, Prisma ORM for type-safe PostgreSQL access, and strict data validation using `class-validator`.
- **Interactive Desktop Web Application:** Built an interactive web application that simulates a functional desktop environment featuring a modal window system designed to showcase character lore for a content creator.
- **High-Performance Blog:** Developed an SEO-optimized, high-performance blog using Astro, achieving a perfect Lighthouse performance score. Implemented Static Site Generation (SSG), MDX content support, automated RSS feeds, and dynamic sitemaps with a modular component-based architecture.
- **mundial-al-dia:** Built a full-stack web application using Bun and the Hono framework to serve server-rendered JSX pages with real-time football match data. Integrated the football-data.org REST API to fetch live, scheduled, and complete match data, including a typed client with Match, Team, and Score interfaces. UI with reusable JSX components and a custom CSS design-token system.

Frontend Architect | *La Nación - Ovidio IT*

Dec 2024 – Apr 2025 | Vicente López, Buenos Aires, Argentina

- Optimized time-to-market across company products by implementing an Nx monorepo architecture in Next.js, centralizing UI components for shared multi-product usage.
- Automated development workflows by configuring custom Nx generators paired with Tailwind CSS and Storybook, completely eliminating manual component boilerplate setup.
- Bridged the gap between design and engineering by integrating an automated Design System that seamlessly synced Figma assets with Confluence documentation.
- **Technologies:** Next.js, React.js, Nx, Storybook, Tailwind CSS, Design Systems.

Mid-Senior Frontend Developer | *Emergencias S.A*

Jul 2021 – Dec 2024 | Coghlan, Buenos Aires, Argentina

- Designed and implemented a 360° management platform that digitized medical appointment scheduling and patient management, significantly reducing administrative errors through robust validation and granular Role-Based Access Control (RBAC).
- Developed a home logistics tracking application integrating Google Maps API, enabling route optimization and real-time tracking of medical transport units.
- Implemented an AI assistant using React and ProseMirror connected to the corporate knowledge base, drastically cutting down resolution times for technical and operational inquiries.
- Supervised Code Review processes and validated Pull Requests across the frontend team to maintain high code quality standards.
- **Technologies:** TypeScript, React.js, Next.js, GraphQL, REST API, Styled-Components, Google Maps API, ProseMirror.

EDUCATION

Associate Degree in Computer Programming (*Técnico Superior en Programación*)

Universidad Tecnológica Nacional (UTN FRA) — Dec 2020 | Buenos Aires, Argentina
